

Way forward and Declarations

- Each and every congregation/Church should have an Environmental Education (EE) desk for collaboration
- Build a database for specialist and experts in each region to assist with Environmental for Sustainable Development (ESD) and EE
- Educators to collaborate with others, enforce what have been learned, initiate exchange programme and more networking
- Enhance capacity building at local level and strategic plan through line ministries and other stakeholders

- Create more awareness through Seminars and other platform possible
- Research results should be developed into publications and be disseminate nationwide
- Ministry of Environment and Tourism (MET) should take the lead as the custodian of the environment in terms the Global Action Programmes (GAPs) and Sustainable Development Goals (SDGs) implementations.
- Future seminars to be prepared in harmony and collaboration with as many as sectors as possible.

- Utilise the existing driving tools in the basins
- Creation of resource mobilisation action plans
- Invest in training of technical staff in local authority and ensure collaboration with the authority
- Involve youth and students on internship to engage on the GAPs and SDGs.
- Establish youth volunteer group to enhance capacity building and skills transfer
- Identify the media and social media group platform to enhance ESD

- Develop conference proceedings which can be shared.
- Identify key proposal writers to seek for funding for future seminars
- For future seminars invite possible funders to attend the seminars to enhance collaboration and partnership. Dr. Alex, Dr. Sirkka & Dr. Ogunmokun
- Practice what we preach, keep Namibia clean by being exemplary to the change that we want to see.
- Look for the possibility of establishing a website to encourage sharing of information.
